### How to Create TA Work Schedule

### ♦Flow of creating and submitting TA work schedule

Please create and submit the "TA work schedule" for each class that TA will work in AY 2024 according to the following flow.

Please submit the work schedule by the due date. (Whenever there is a change in the work schedule, please update and resubmit the document.)

#### ♦How to create a TA work schedule

### 1. Check the course information (e.g. annual working hours).

Please enter the job number in the "Job number" field at the top right of the Excel sheet. The course information will be displayed. The job number will be given to each student through the instructor.

### 2. Enter the student information as of April 2024.

If the student will newly enroll in master's/doctoral program in April 2024, "Student ID" field must be left blank. "Program" is a field where you can enter the name of the program to which the student belongs as of April 2024. Do not write your student ID number or affiliation as an undergraduate or research student.

## 3. Enter the number of working hours in "daily working hours" fields for each scheduled working day.

Please note the following rules:

- 1 period is counted as 1.5 hours.
- Working hours per day starts from 1 hour (in 0.5-hour increments).
- Maximum working hours per day is 7.5 hours. If you work for more than one class, make sure that the total number of hours in all classes does not exceed the daily working hours limit.

### **♦**Notes

- The TA attendance book is created based on the submitted work schedule. Therefore, if the work schedule
  changes, you should immediately update and resubmit the document. Please make sure to enter the
  "submission date" in the upper left so that we know when you submitted it.
- If the information displayed in the course information field (e.g. instructor, term, day and period) is out of date, please notify us at sysinfo.ta@un.tsukuba.ac.jp immediately.
- The total of daily working hours from April to March must not exceed the "Annual working hours." If the total number of working hours you have entered exceeds the annual working hours your instructor has planned, you will see "Exceeded" in red at the bottom right of the table.
- The schedule for working as RA or short-term employee and the schedule for working as TA must not overlap.

#### **♦**How to submit

If you are currently enrolled in the University of Tsukuba (UT) (i.e. have a student ID number and can sign in to your Learning Management System ("Manaba") account), you can submit the TA work schedules and other employment documents online at <a href="https://www.ecloud.tsukuba.ac.jp/en/learning-management-system-manaba">https://www.ecloud.tsukuba.ac.jp/en/learning-management-system-manaba</a>. Please complete self-registration for the course with the registration key "9246841" and submit documents from "Assignment" menu.

If not, please mail the designated documents or bring them directly to the Academic Service Office for the Systems and Information Engineering Area (Graduate Support).
